CAREER OBJECTIVE

Detail-oriented and proactive Information and Computing Science student with hands-on experience in Python development, full-stack web development, UI design, data cleaning, and quality assurance. Committed to delivering clean, efficient, and user-friendly digital solutions, with a strong ability to manage data, test systems, and collaborate effectively within teams. Seeking an On-the-Job Training (OJT) placement as a Data Entry Virtual Assistant, Junior Developer, or QA Tester to apply and further develop these technical skills in a professional setting.

EDUCATION

Bachelor of Science in Computer Science *2023 – Present*
University of Santo Tomas

Senior High School – STEM Strand *2023*
University of Santo Tomas

RELEVANT PROJECTS

ShopZada Data Warehouse *December 2025*
Python • Pandas • PostgreSQL • Docker • Apache Airflow • Power BI

- Designed a full ETL pipeline for a multi-department e-commerce dataset as a Data Warehousing capstone project, covering ingestion, transformation, and loading stages.
- Implemented a Kimball star schema with SCD Type 2 change tracking to preserve accurate historical records across all departments.
- Built Power BI dashboards surfacing business-ready KPIs; architected the hybrid ETL pipeline and authored all data-cleaning scripts.

Dolly's Closet — Fashion E-Commerce Website *2025*
React.js • Tailwind CSS • Node.js • Supabase

- Developed a fully responsive e-commerce website for a local fashion brand, featuring a product catalog, filtering system, and a clean, on-brand UI.
- Implemented a Supabase-backed inventory and order management system with real-time updates and secure authentication.
- Focused on delivering an intuitive shopping experience across mobile and desktop, translating the brand's aesthetic into the digital interface.
